

QUADERNO DI MATEMATICA

★ Classe Terza ★

A long-necked dinosaur is pointing its right index finger at a large, flat rock. On the rock, the multiplication problem $9 \times 8 = 72$ is written.

$$9 \times 8 = 72$$

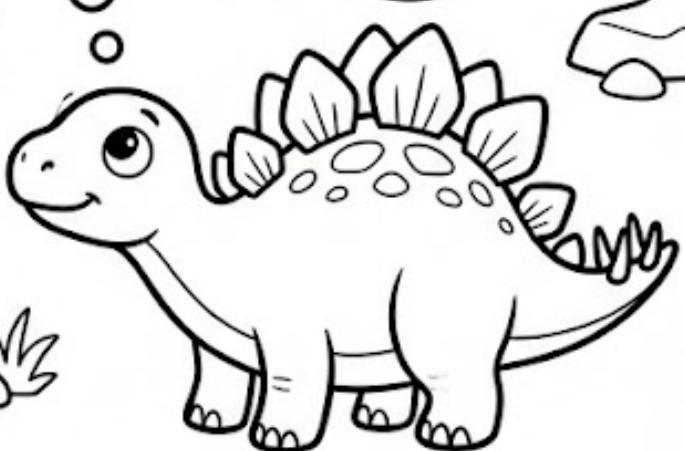

Two dinosaurs are standing next to a large, stylized number zero. One dinosaur is on the left, looking at the zero, and the other is on the right, standing behind it.

$$1250 - 145 = \text{????}$$

A Triceratops is sitting on the ground, holding a pencil and writing the number 1000 on a small rock.

1000

A Stegosaurus is standing and looking towards the left. It has a row of bony plates along its back and a small crest on its head.
